

Sr Project Manager (Texas, USA)

Requirements:

- University degree in Civil Engineering, Architecture, Project Management, or related fields.
- PMP certification or other Project Management methodologies.
- Software: Proficiency in Microsoft Office, MS Project, Primavera, AutoCAD, 3D CAD.
- Language: Advanced English, reports to a global company.
- EXPERIENCE IN THE USA, preferably TEXAS. A Mexican resident is acceptable.

Objective:

Lead, plan, and supervise the construction of industrial buildings, from design to delivery. Optimize resources, control costs, and ensure compliance with technical, safety, and environmental regulations.

Experience (Min. 9 years):

- Large-scale industrial project management, especially in the USA.
- Construction systems supervision: tilt-up, steel, concrete, foundations, earthworks.
- Regulations and building codes (PCI, RSCIEI).

Key Responsibilities:

- Planning & Design:
 - Define scope, objectives, deliverables.
 - Create/manage schedules with milestones.
- Execution & Supervision:
 - Oversee construction, ensure standards.
 - Conduct site inspections, manage changes.
 - Coordinate systems: electrical, HVAC, etc.
- Budget & Resources:
 - Handle budgets, negotiate costs.
 - Manage risks and regulatory compliance.
 - Liaise with client, contractors, authorities.
 - Present progress and cost reports.

We offer:

- Competitive salary.
- Legal and superior benefits.
- Job stability.
